

We call for the NATIONAL SCIENTIFIC COUNCIL COVID-19 WAR POLICY ASSESSMENT

Under the aegis of the European Forum for Vaccine Vigilance and the Commission d'Enquête Citoyenne Internationale Francophone, we call for the establishment of a scientific council whose mission is to evaluate the executive's Covid-19 war policy in response to the independent national mission to assess the crisis management of Swiss epidemiologist Didier Pittet.

Ladies and gentlemen,

We appeal here to the Union: that our national and international organizations, in the coming weeks, march together to put an immediate end to the experimental vaccination campaign in progress.

Immersed in an extraordinary context, we must invent together an extraordinary resistance and cooperation, national and international

This is the fight of a lifetime

The peril that awaits us is immeasurable

We have to choose between two paths:

- One is a path of submission and dependence on an autocratic and dictatorial minority: the reduction or disappearance of the human.
- The other is a path of global health, democratic emancipation and harmony: the pursuit of human evolution.

We go into resistance

We have before us the most powerful actors of the world economic and political system. They put together a plan that seems to be a plan that seems to be well prepared, even orchestrated.

ARE YOU WISHING TO JOIN US ?

In Paris on 3 July 2021 from 1 pm.

To register send an email to CECIF-COV@protonmail.com
Commission d'Enquête Citoyenne Internationale Francophone.

**The place of the meeting will be communicated to you confidentially by return of email.
This meeting will also be accessible by zoom. (Ask for a link)**

Our union will speak for itself to the French and to the world

In the current disorder and extreme confusion of ideas, our union will speak for itself. It will show that there is a common front and therefore a hope.
